INTERNATIONAL SEARCH REPORT

memational application No.
PCT/JP2004/003339

A CLASSIEIC	ATION OF SUBJECT MATTER				
A. CLASSIFICATION OF SUBJECT MATTER Int.Cl ⁷ G06F9/06, G06F9/445					
	•				
The second Potent Classification (IDC) are to both national classification and IDC					
According to International Patent Classification (IPC) or to both national classification and IPC					
B. FIELDS SEARCHED Minimum documentation searched (classification system followed by classification symbols)					
Minimum docum	entation searched (classification system followed by class G06F9/06, G06F9/445, G06F13/00	0, G06F15/00, G06F17/60)		
1110.01	33013,00, 30013,113, 210140, 1				
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched					
Jitsuyo Shinan Koho 1922-1996 Toroku Jitsuyo Shinan Koho 1994-2004					
Kokai Jitsuyo Shinan Koho 1971-2004 Jitsuyo Shinan Toroku Koho 1996-2004					
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)					
JST FILE(JOIS), in Japanese, Computer Software Data Base (Japanese					
Patent	Office): in Japanese

Box No. II	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)			
1. Clas	onal search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: ims Nos.: ause they relate to subject matter not required to be searched by this Authority, namely:			
bec	ims Nos.: 7 ause they relate to parts of the international application that do not comply with the prescribed requirements to such an ent that no meaningful international search can be carried out, specifically: extra sheet.)			
3. Cla	aims Nos.: cause they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).			
Box No. III				
This International Searching Authority found multiple inventions in this international application, as follows:				
	s all required additional search fees were timely paid by the applicant, this international search report covers all searchable			
2. As	s all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of by additional fee.			
3. As	s only some of the required additional search fees were timely paid by the applicant, this international search report covers aly those claims for which fees were paid, specifically claims Nos.:			
4. N	o required additional search fees were timely paid by the applicant. Consequently, this international search report is estricted to the invention first mentioned in the claims; it is covered by claims Nos.:			
Remark o	The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.			

Continuation of Box No.II-2 of continuation of first sheet(2)

In claim 7, there is a statement that the first function generation information is changed to the third function generation information when the second function generation information is judged to be "the same" as the third function generation information. However, this statement is not supported by the description and drawings at all.

If the above technique of claim 7 is used, carried out is an obviously irrational processing that the latest first function generation information is changed to the previous function generation information only for the reason that the versions of the second and third function generation information are the same (the old version information on the second function generation information is the same as that on the third one) even if the first function generation information indicates a newer version than those of the second and third function generation information. Namely, normal operation cannot be done.
